

Core return instructions

Your invoice includes a refundable core deposit. Return the old long block in the crate we shipped and the full deposit is refunded after inspection.

Steps

1. Keep the crate, bolts, and prepaid return labels that arrived with your remanufactured long block.
2. After install, load the old core into the same crate. Drain fluids. Do not return a seized, fire-damaged, or disassembled block without calling us first — that may reduce the refund.
3. Affix the prepaid freight documents to the crate. Photograph the closed crate.
4. Hand to the listed carrier. Email enginesnearme@gmail.com the tracking number.
5. We inspect the core and refund the deposit to the original payment method, typically within 10 business days of receipt.
