

Limited Protection Plan — 6 months / 10,000 km

This protection plan covers workmanship and product defects in remanufactured Hyundai and Kia long blocks supplied by Engines Near Me, for six (6) months or 10,000 kilometres from the date of invoice, whichever occurs first.

What is covered

Defects in machining, assembly, and included internal components of the long block when installed by a certified installer according to the instructions below.

Required at installation (mandatory)

The certified installer **must replace the external engine oil cooler** and flush the oiling system. Failing to replace or flush the oil cooler **voids this protection plan**. New oil, filter, and any Hyundai/Kia TSBs for the application must be followed.

What is not covered

Labour beyond the long block, towing, rental vehicles, consequential damage, overheating, lack of oil, detonation, incorrect tuning, used or dirty coolers, and engines installed by non-certified shops. External components not supplied with the long block are excluded.

How to make a claim

Call 647-233-2719 or email enginesnearme@gmail.com before any teardown. Provide invoice number, VIN, mileage, and a description of the concern. Unauthorized teardown may void coverage.
